The Honorable John F. Kennedy
Senate Office Building
Washington, D. C.

My dear Senator Kennedy:

The enclosed speech which I recently delivered before a meeting of the Mid-West Coal Producers Institute, Inc., expresses, I believe, the feeling of responsibility which the coal industry today has toward our nation's economic future and the part the industry must play in it.

In view of the importance of coal and other fuels to our economy, and because Congress is now considering authorizing a study of the need for a sound National Fuels Policy, I thought these remarks might be of interest to you.

I also enclose a press release based on the speech which summarizes it in brief form.

Sincerely yours,

Joseph E. Moody
